

South Africa's most affordable SMS portal

Why overpay for messages that never arrive?

At SMSFlow, we combine powerful tech, local failover reliability, and enterprise-level delivery to offer an affordable, scalable, and feature-rich SMS solution tailored for modern South African businesses.

WHY SMSFLOW?

Lightning-fast & reliable - Over 90% delivery rate

Thanks to our backing from the largest global network, 400+ transactions per second, and local network failover between Vodacom & MTN, your messages get where they need to go—fast and reliably, every time.

Better rates without the compromise

We cut out unnecessary intermediaries and optimise our routing through smart partnerships—giving you top-tier delivery at some of the lowest rates in the market. No catch. Just great pricing that makes sense.

Level 1 B-BBEE

Support transformation while scaling your communication. We are proudly Level 1 BEE certified, making SMSFlow a value-aligned and strategic business partner.

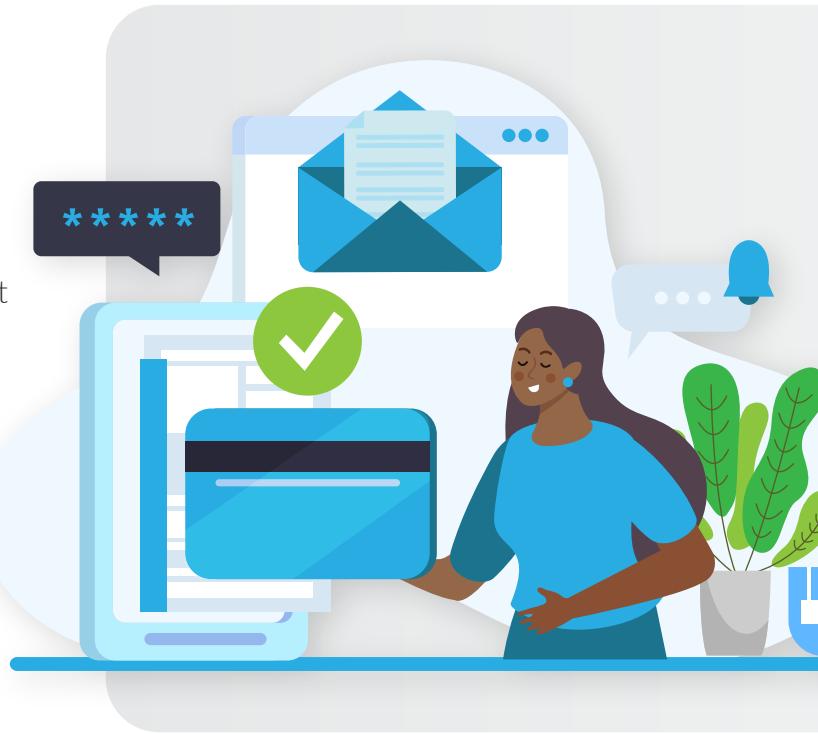

BUILT FOR MARKETERS, MADE FOR DEVELOPERS

Smart features, simple interface

Our front-end gives you full control:

- 1 Customisable Templates
- 2 Bulk Scheduling
- 3 Campaign Management
- 4 Tracking & Delivery Reporting
- 5 Automated Workflows & Auto-Replies

You're not just sending messages
— you're running campaigns like a pro.

Need to integrate? We've got the stack.

With our full RESTful API stack, you can plug SMSFlow into your CRM, website, or custom system seamlessly.

Visit our API portal for developer docs and setup guides [here](#).

Two-way communication that actually works

Don't just talk—listen.

Our reply functionality empowers real-time customer interaction, feedback loops, support responses, and campaign engagement.

Dedicated channels – Marketing vs Transactional

Split your messaging for priority and performance. Whether it's OTPs or promotions, our dedicated transactional & marketing channels optimise delivery speed and price—keeping things efficient and organised.

Local & global numbers that represent you

Need a professional edge? Use short codes, long codes, or branded international numbers — like Investec's — for secure, high-impact messaging.

It's more than just a sender ID—it's a trust signal your audience notices.

Start sending smart
— The smart way to connect.
